

commercial - broadway station

mixed land use

Larry Young Park and Local Heroes Pathway enables Commercial-Broadway residents to engage in various activities within their communities. In this neighbourhood there is access to a variety of amenities which encourages physical activity and social engagement.

community playground

This community playground enhances connectivity and networking which increases neighbourhood social capital. This social space has the ability to decrease time spent in vehicles, increase traffic safety, increase active transportation, and improve air quality. The potential long-term benefits of community land use include a decrease in non-communicable diseases and premature mortalities.

the drive temporary community garden

This sustainable garden enhances agricultural capacity, improves access to healthy foods and increases social interaction while enabling community members to be self-sufficient. Community gardens promote alternative forms of physical activity as well as engagement with the natural environment. The associated healthy behaviours have positive impacts on both physical and mental health.

clark park

Clark Park is a community oasis that provides an escape from the hustle and bustle of city living. The park's proximity to a densely populated urban setting, allows for easy access for all while protecting the ecosystem and improving air quality. Furthermore, it aids in reducing the urban heat island effect. This greenspace has the potential to improve mental, physical and social well-being.

green streets

Green Streets is a community-based program that enhances the neighbourhood aesthetics which increases walkability, perceived safety, and overall physical activity. This healthy neighbourhood design promotes social cohesion and increased social capital.
