

WATERFRONT STATION

Benches support and encourage community interaction. This photo shows a number of outdoor benches for individuals to sit and socialize. The benches are good for physical health as they provide resting places for people with limited mobility. Some of these benches even include a canopy roof to allow for use in the rain

This photo shows the efforts being made to make outdoor spaces accessible for people of all abilities, not solely for those who are fortunate enough to be able bodied. Providing a wheelchair ramp allows everyone to have equal accessibility and enjoy the outdoor space.

3

This photo shows several car share options in a central location close to apartments and commercial areas helping to increase accessibility. It allows people to have access to a car for longer trips but still promotes other ways of active transportation as a primary option.

4

This walkway along the water has lights along the path. By being well lit it supports walkers throughout the day and even into the night. It promotes safety and an increased sense of security for all kinds of walkers. It allows the path to be used even more.

5

Bike racks were located outside of several office buildings and in this photo the fitness center. This encourages people to bike to work and allows them to store their bike in a safe, dry place. Active transportation is a much healthier way to get around for both the individual and the environment

6

This photo shows the start of the Vancouver's Seaside Greenway. A bike path to encourage an active lifestyle by creating a safe riding zone for cyclists and pedestrians to be free from moving vehicles. The path also encourages active transportation for short trip. It also increases air quality with reduced car use and greenery throughout the path.
